

RPMGLOBAL

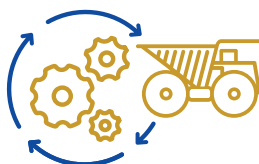

Consulting & Advisory Coal Geology

RPMGlobal's Advisory team advise the global mining industry on their most **critical issues and opportunities**, from exploration through to mine closure. Our deep domain expertise—combined with a culture of innovation and global footprint—ensures our mining customers continue to lead.

A Global Authority

RPMGlobal's coal consulting and advisory expertise spans across all key mining methods globally. Through technology and deep domain knowledge, RPMGlobal's coal division create solutions that drive efficiency and cost structure improvements so miners can extract more value from their coal deposit. Our coal geology experts are located in all major coal producing regions around the world, including Australia, South Africa, Indonesia, Russia, China, Central Asia, Turkey and the United States.

Independent Insights

As the leading consultancy provider to the mining industry, RPMGlobal's expert advice and solutions have helped companies achieve value at every step of the mining value chain. We have completed over 5,000 coal studies in nearly every coal type and mining scenario, and there are few mining challenges that we have not seen.

Our reputation for independent assessment and financier due diligence roles remains second to none and we take pride in our prestigious track record.

Expert Advice

Our professional consultants are trusted and relied upon by the industry and its investors to offer proven, up-to-date advisory solutions.

RPMGlobal partners with mining clients and investment firms to deliver bespoke and independent insights and advice based on our strong understanding of the requirements of the mining industry.

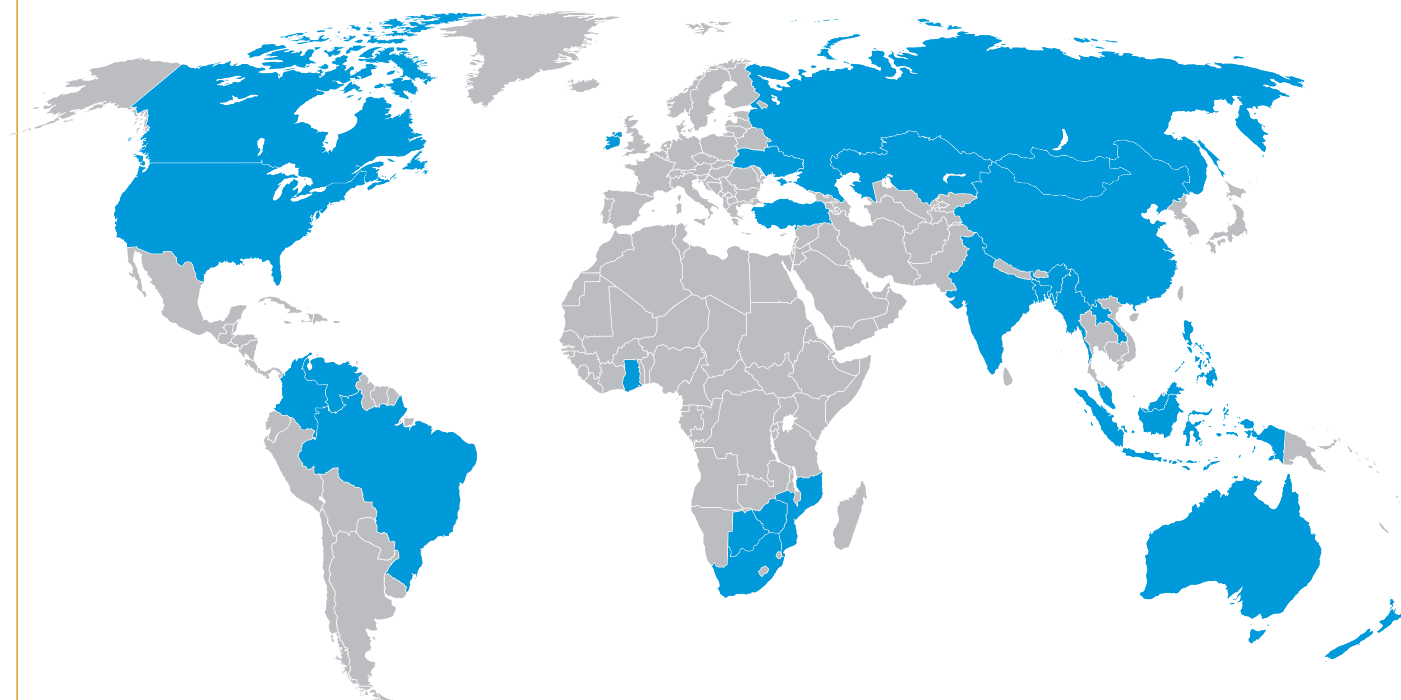

Take your mining project to the next level

Our highly experienced coal geology team has a broad range of experience in exploration, operations and resource development for mining companies and consulting firms worldwide. We use this experience to identify the key value drivers and technical risks for each project, and then deliver economic and innovative solutions to improve operational efficiency and compliance with recognised industry standards and codes. Explorers, miners, investors and financiers rely on our assessments which consider both the challenges and opportunities presented by the occurrence of regional and local geology features within a mining

project. We collaborate with specialist in-house teams and trusted associates to provide complete geology solutions for all open cut and underground coal exploration and mining projects.

Our engagements can extend to on-ground exploration activities (including geological mapping, drilling and geophysical surveys), advanced coal quality and coal processing simulations, coal marketing assessment, gas reservoir characterisation and testing, geotechnical assessment, hydrogeology, environmental approvals, and health & safety.

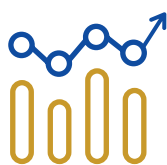

RPMGlobal's Advisory team has completed projects in **every major coal jurisdiction** around the world.

Exploration & Data Validation

- Target assessment, asset analysis and ranking.
- Exploration planning and technical advice.
- Geological supervision and exploration project management.
- Data collection, data management and data validation.
- Digital transformation, consolidation and validation of historical data.
- QA/QC of geological and coal quality data and collection practices.
- Geological and geophysical interpretation.
- Seam correlations.
- Coal quality advice and assessment.

Geological Modelling & Resource Evaluation

- 3D structural and coal quality modelling.
- Resource classification, estimation and reporting in accordance with recognised industry Codes (e.g. JORC, NI 43-1).
- Project evaluation and resource risk analysis.
- Drill hole spacing analysis.
- Geostatistical analysis.

Mining & Other Support Services

- Mine reconciliation studies.
- Design and implementation of grade control procedures.
- Investigation of solutions for geological challenges.
- Due Diligence and Independent Technical Reviews.
- Scoping, Concept & Feasibility Studies.
- Mergers, acquisitions and divestments.
- Lender's and owner's engineer.
- IPO's and capital market transaction support.
- JV and investor technical representation.
- Expert witness.
- Peer review and auditing.
- Training and mentoring.

About RPMGlobal

RPMGlobal is the global leader in the digital transformation of mining. We provide data with context, transforming mining operations. Our enterprise approach, built on open industry standards, delivers the leading digital platform that connects the systems and information and seamlessly, amplifying decision-making across the mining value chain. RPMGlobal integrates the design, planning and scheduling, with maintenance and execution, with simulation and costings, on RPMGlobal's Enterprise Planning Framework, the mining industry's only digital platform that delivers insight and control across these core processes.

RPMGlobal's Advisory Team advise the global mining industry on their most critical issues and opportunities, from exploration to mine closure. Their deep domain expertise, combined with their culture of innovation, and global footprint, ensures our mining customers continue to lead. RPMGlobal is the global leader in Enterprise mining software, Advisory services and Professional development who operate offices in 23 locations across 13 countries and have worked in over 118 countries.
